About Me

Working as a web designer since 2022, I combine creativity with technical skills. Along the way, I have expanded my knowledge in development and improved my communication abilities to collaborate effectively with various teams

Skills & Tech

- Design UI/UX
- HTML/SCSS/Javascript/Bootstrap
- Prototyping (Figma/Protopie)
- SQL Database Management
- Project Management
- Ability to prioritize
- Working under pressure
- Perseverance through challenges
- Responsiveness to change

Languages

- French | Native
- English | C1
- Dutch | A2

Prix

Jury Prize | Hackathon Citizen of Wallonia 2024

- With my team, I developed a prototype for a social mobile application aimed at connecting young parents in Belgium. As the team's lead designer, my contributions were essential in securing the award.

Education

Full-stack .NET Development + Cybersecurity

Nov 2023 - May 2024 | Technofutur TIC Training (Charleroi A6K)

Focused on application development with an emphasis on cybersecurity, mastering C#, Angular, and Javascript to design robust and secure applications.

UI/UX Web Design

Sept 2019 - June 2021 | CEPEGRA Training (Gosselies)

Gained a deep understanding of fundamental design principles such as composition, color, typography, and visual hierarchy. Conducted usability tests and user interface evaluations to improve interface simplicity.

Master's in Transmedia Architecture

Sept 2019 - June 2022 | Haute école Albert Jacquard & UNamur

Mastered transmedia storytelling tools and techniques, developed skills in audiovisual production and project management, preparing for a career in the creative and cultural industries.

Bachelor's in Multimedia Writing

Sept 2015 - June 2019 | Condorcet (Charleroi)

Mastered captivating scriptwriting, interface design, and audiovisual production, while developing technical, creative, and collaborative skills.

Experience

Freelance Developer | For self-employed professionals and SMEs

May 2021 - Present | Freelance | Belgium

- Designing and programming responsive websites according to client specifications.
- Deploying and improving the performance of existing websites, and providing client support.
- Implementing SEO and optimization strategies to ensure high visibility on search engines.

Analyst Programmer

Sept 2024 - Apr 2025 | IPS Group | Nivelles

- Organized technical solutions, defined architecture, and developed the ERP application.
- Designed, developed, optimized, and maintained IT applications based on business requirements.
- Created and maintained databases using principles of relational modeling and SQL.

Front-end Developer

Apr 2023 - Sept 2023 | Upartner Agency

- Produced websites using CMS WordPress and Elementor.
- Optimized blog posts and images to make websites faster and more efficient.
- Managed website creation from prototype to launch.

Web-designer

Dec 2022 - Feb 2023 | Arkam Agency | Mons

- Created website mockups in line with client's aesthetic and functional goals.
- Participated in creative meetings to discuss graphic concepts and find innovative solutions.
- Designed web pages for new and redesigned website projects.
